

RISING 6<sup>th</sup> Graders:

**Packet**

This packet is meant to keep the skills you learned in grade 5 fresh over the summer and make for an easier transition to grade 6 math. Please complete 3 problems per week over the 10 weeks of summer break. (Please keep your work and attach it to the packet if it's on a separate sheet.) If you are going on vacation, you can certainly double up on the weeks before and after your vacation and leave your packet at home! Please turn in your completed packet to Mr. Huston on your first day of school in September. This packet will be your first math grade as a 6th grader! Have a great summer!
